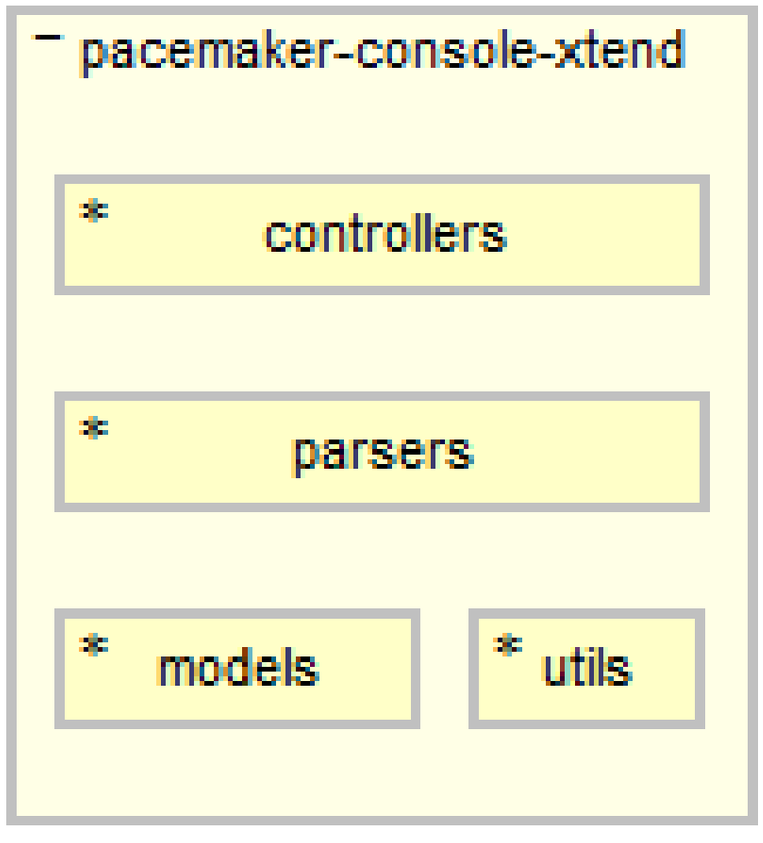
Assignment Solution

Structure 101 Analysis

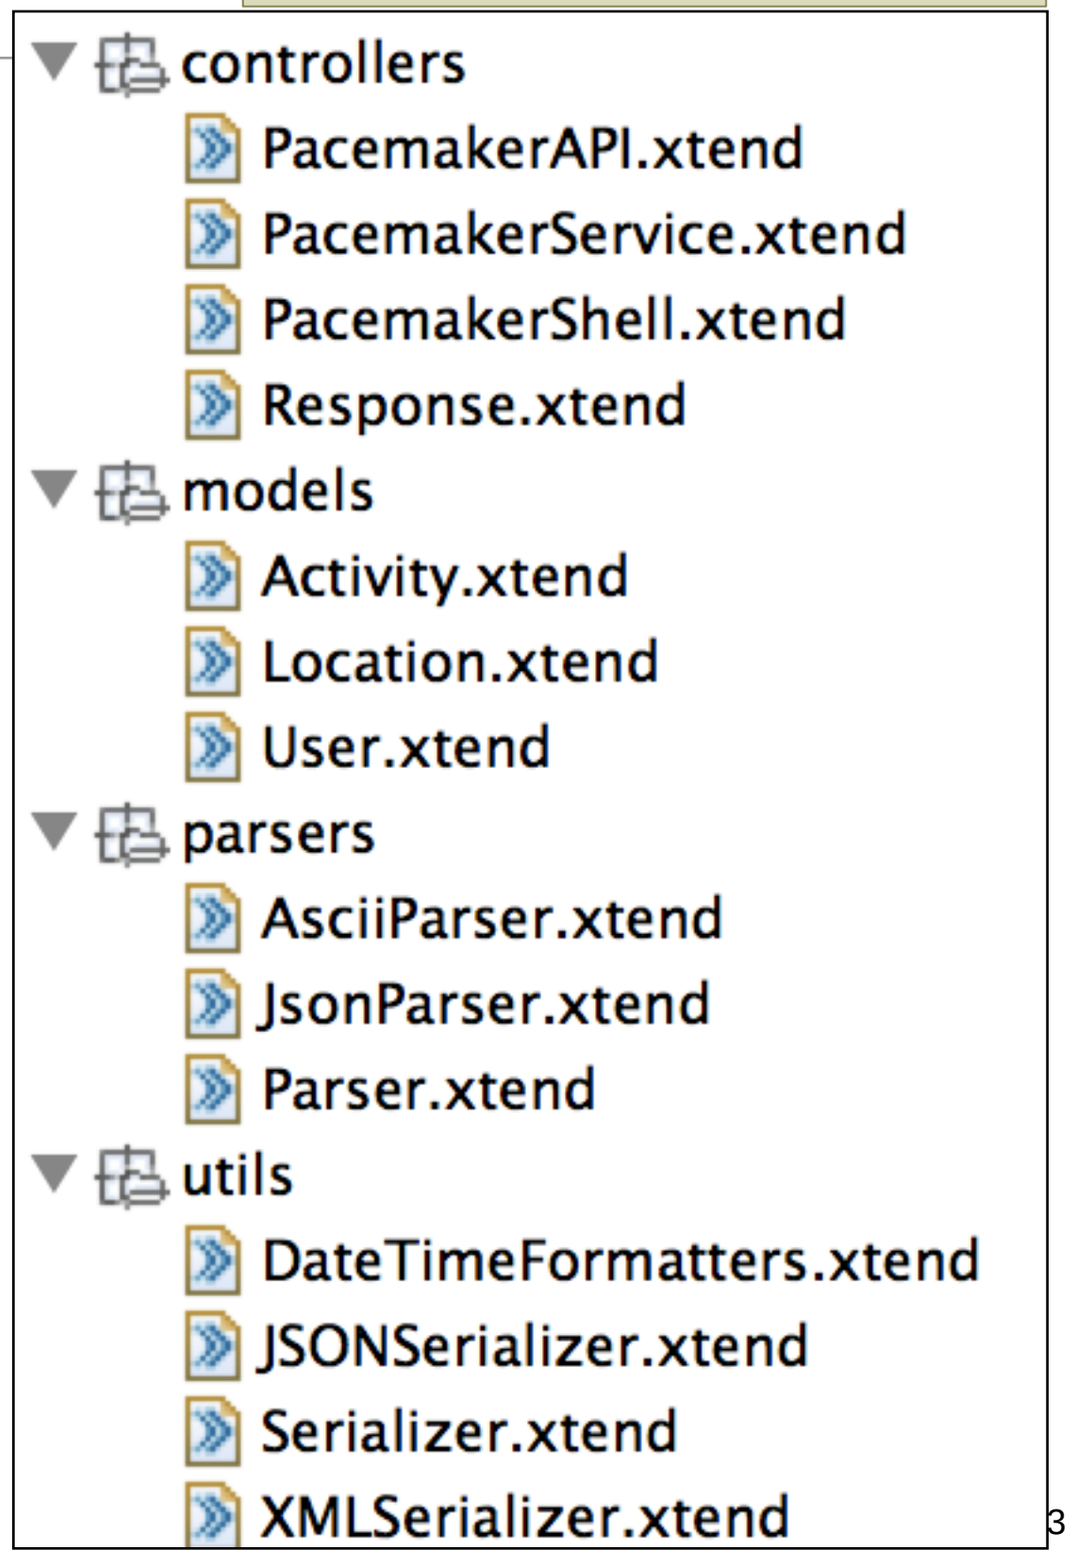
pacemaker-console-xtend

The assignment solution has:

- a number of source files.
- interdependencies between these files.



Physical Organisation



Containment model (dependency graph)

- Use containers (packages) to manage complexity.
- Containment creates dependencies between containers.
- How we organise our containers is key to controlling dependencies between the containers.

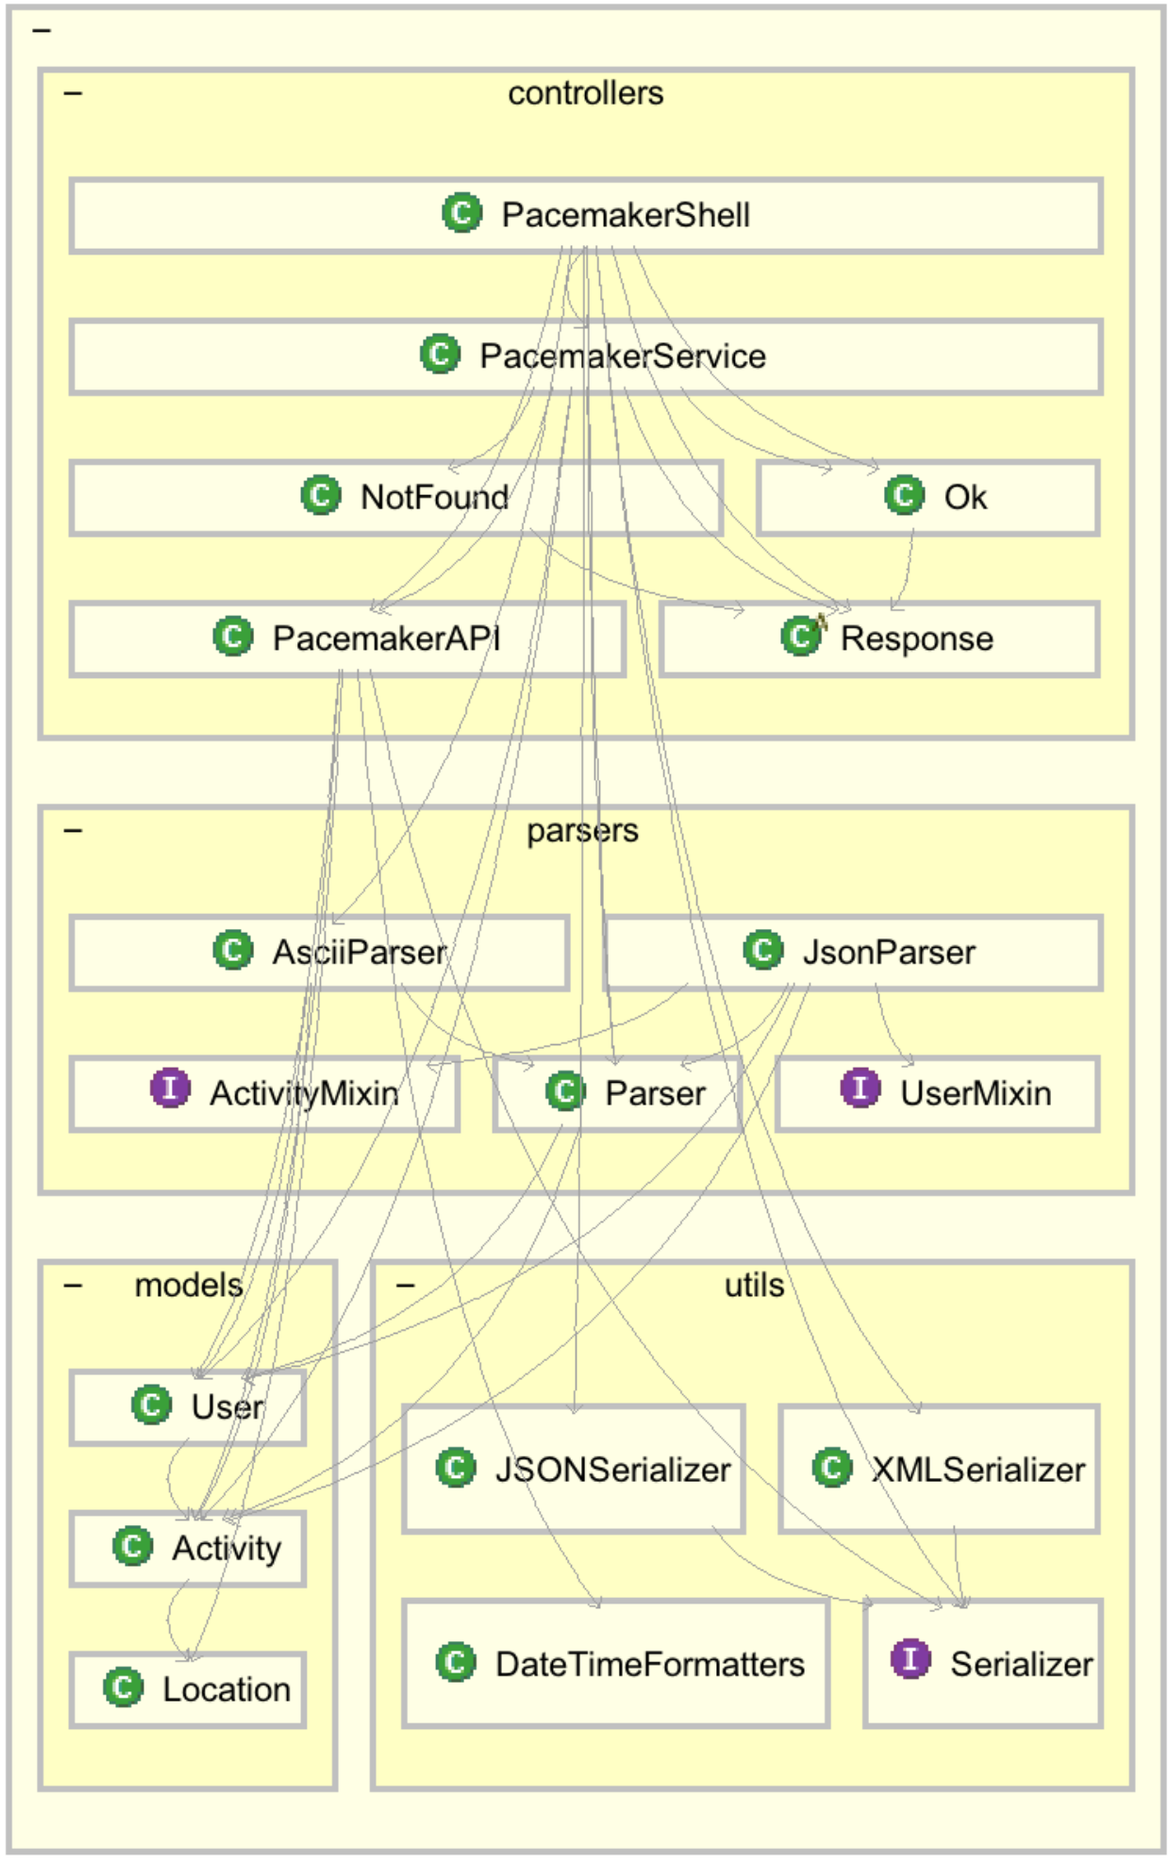
Dependencies

- When dependencies all point in the same direction (e.g. downwards), the cumulative dependency is smallest.

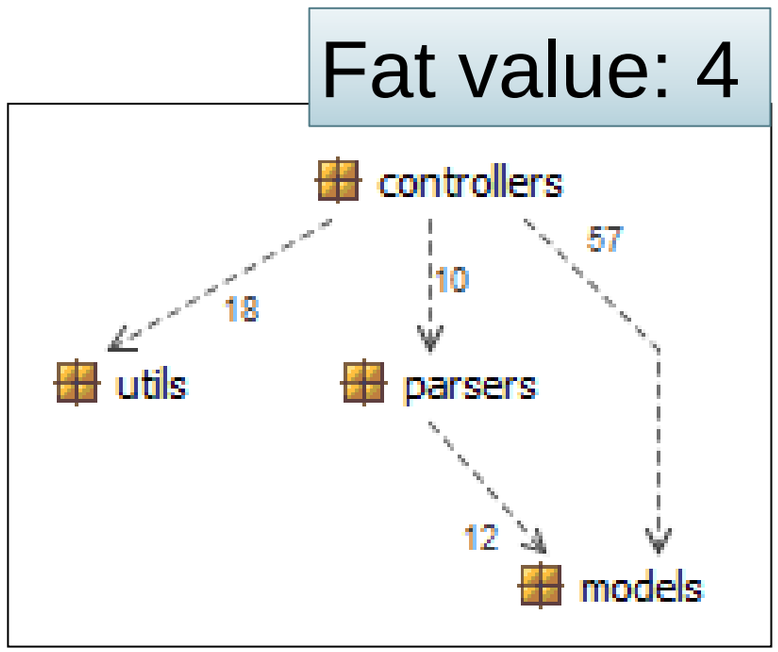
- When you have cyclical dependencies (i.e. dependencies pointing upwards) the cumulative dependency becomes large and you have what is called a **Design Tangle**.



Measuring complexity in a code base.

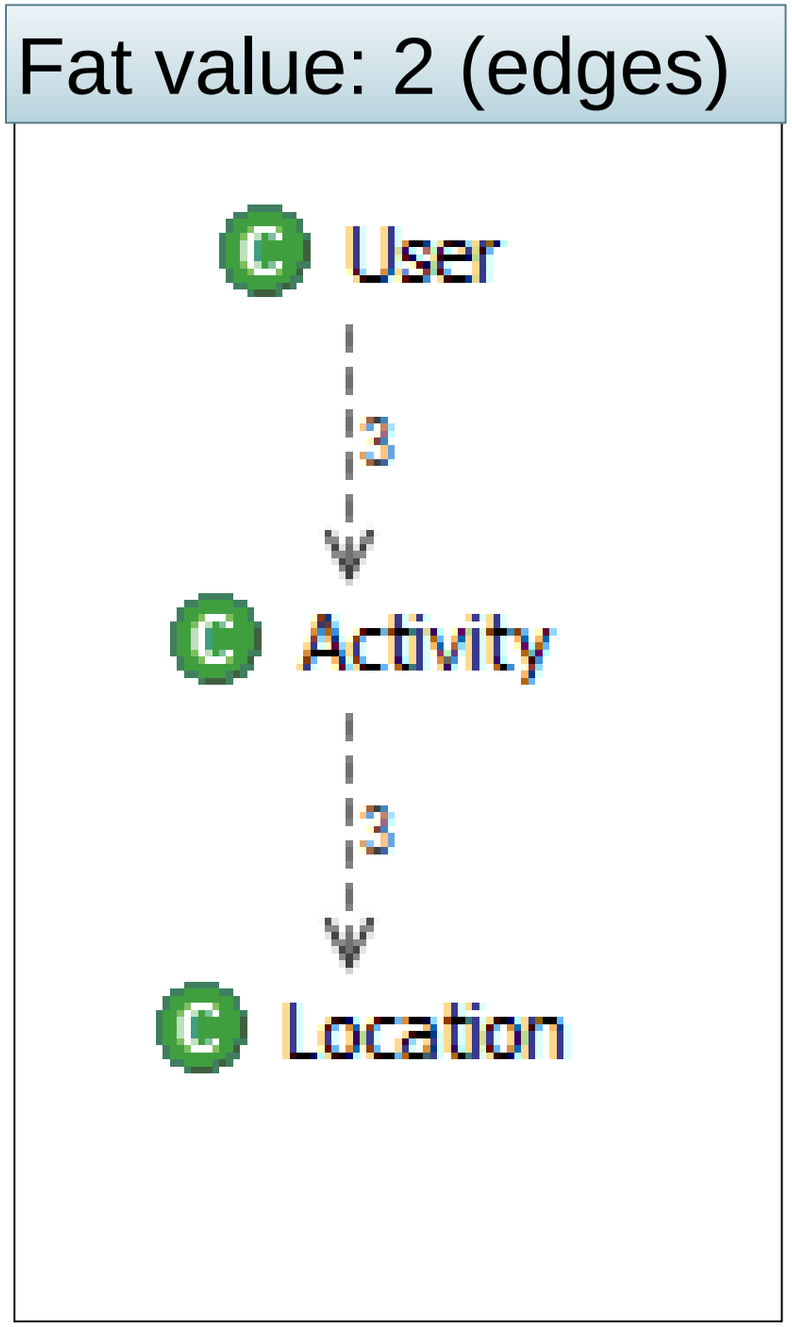
Excess complexity is measured in terms of 2 metrics:

- Fat is a measure of the compositional (breakout) complexity at ***every level*** e.g. number of edges in a dependency graph. Default threshold in Structure101 is 15 (methods), 120 (design, package, class level).
- Design Tangles are cyclic dependencies between packages, measured at the breakout of high-level packages ("design level"). Default threshold in Structure101 is 0% - always undesirable!

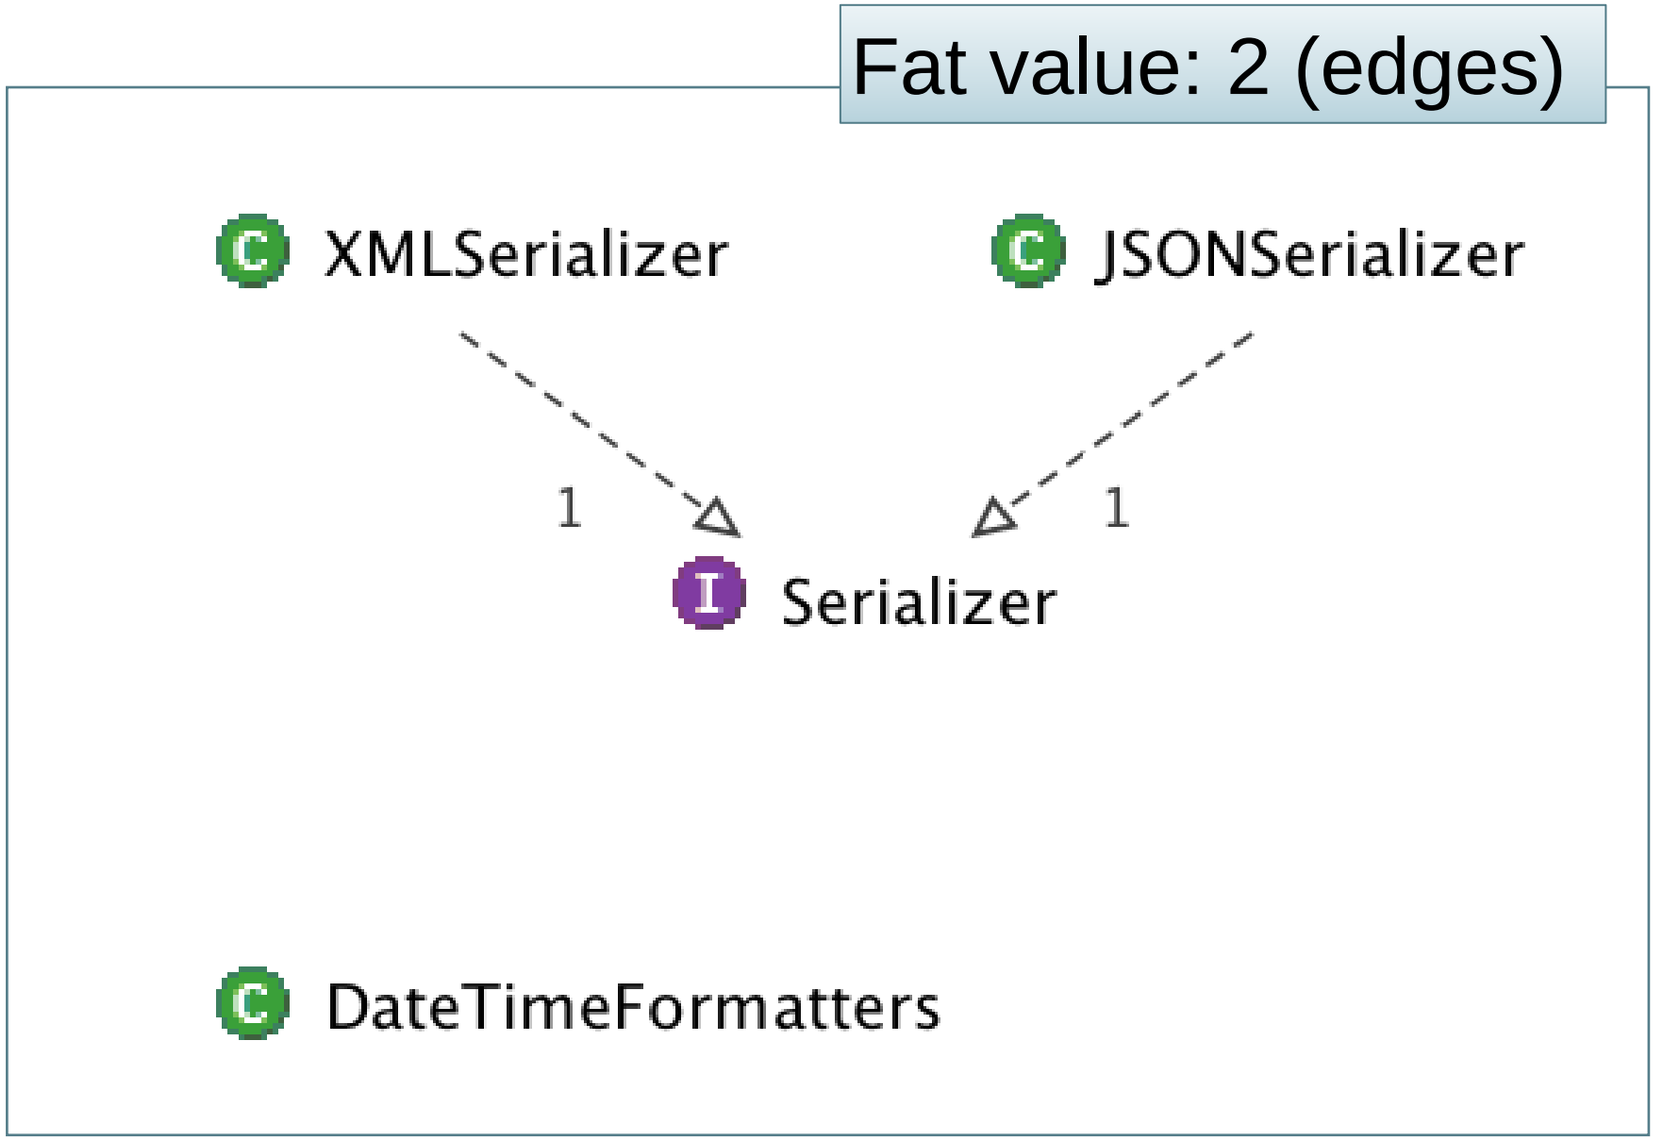


https://structure101.com/help/java/structure101/Content/xs/measuring-complexity.html

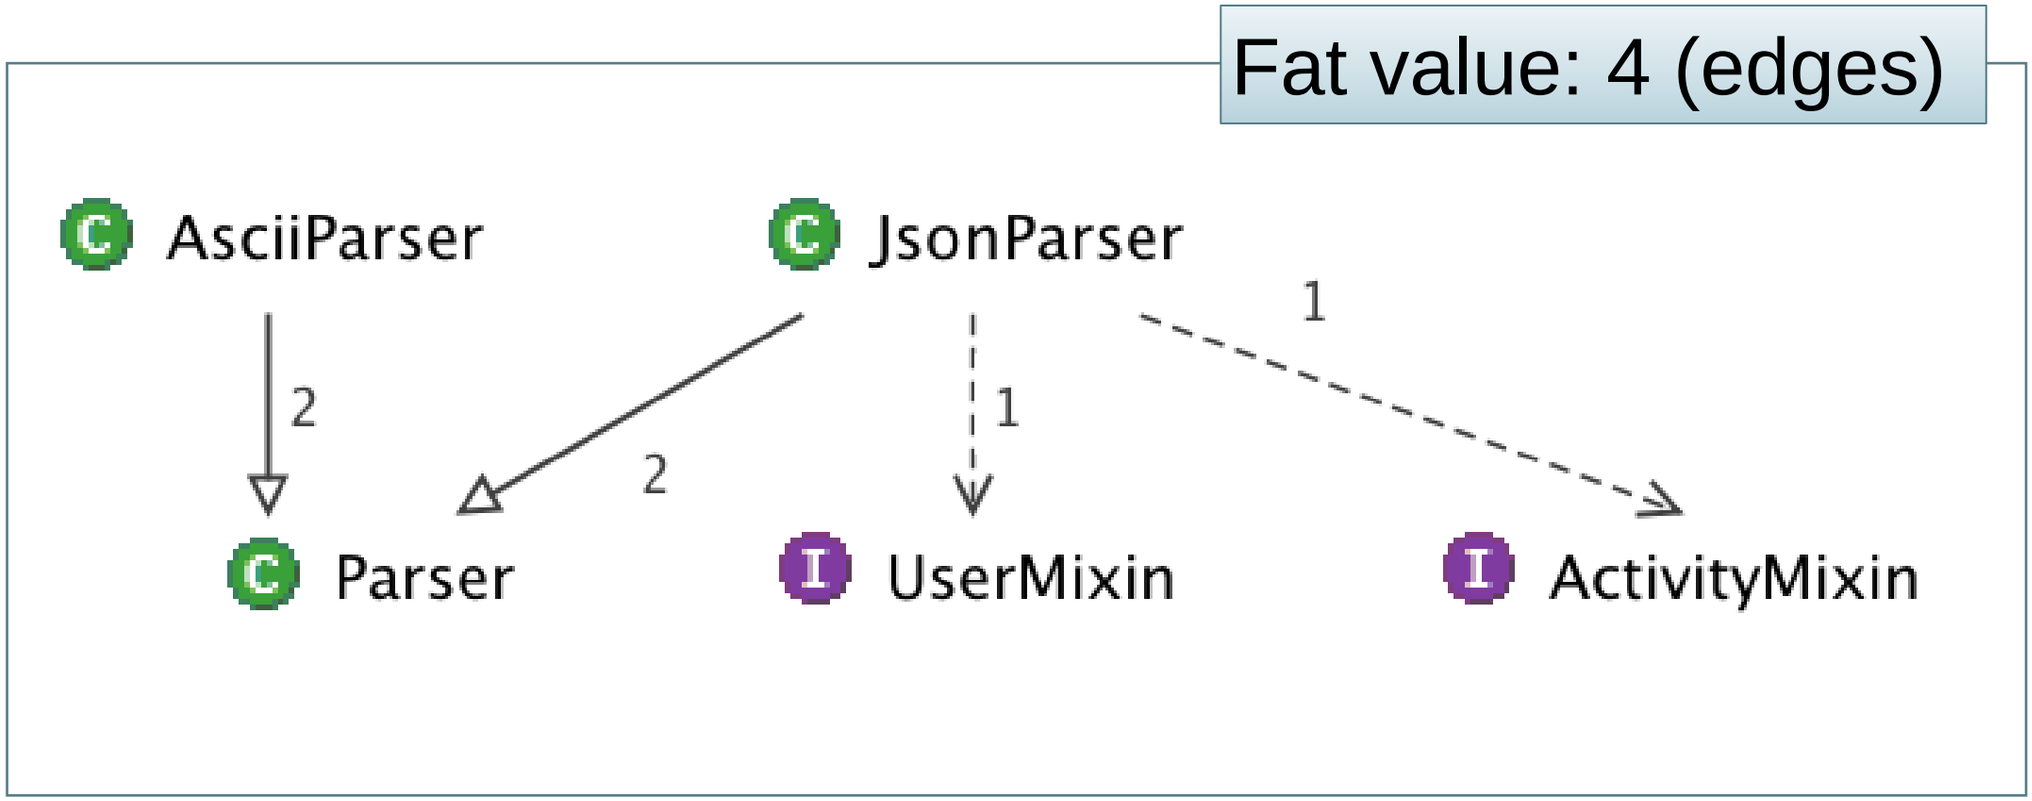
Dependency graph (models)



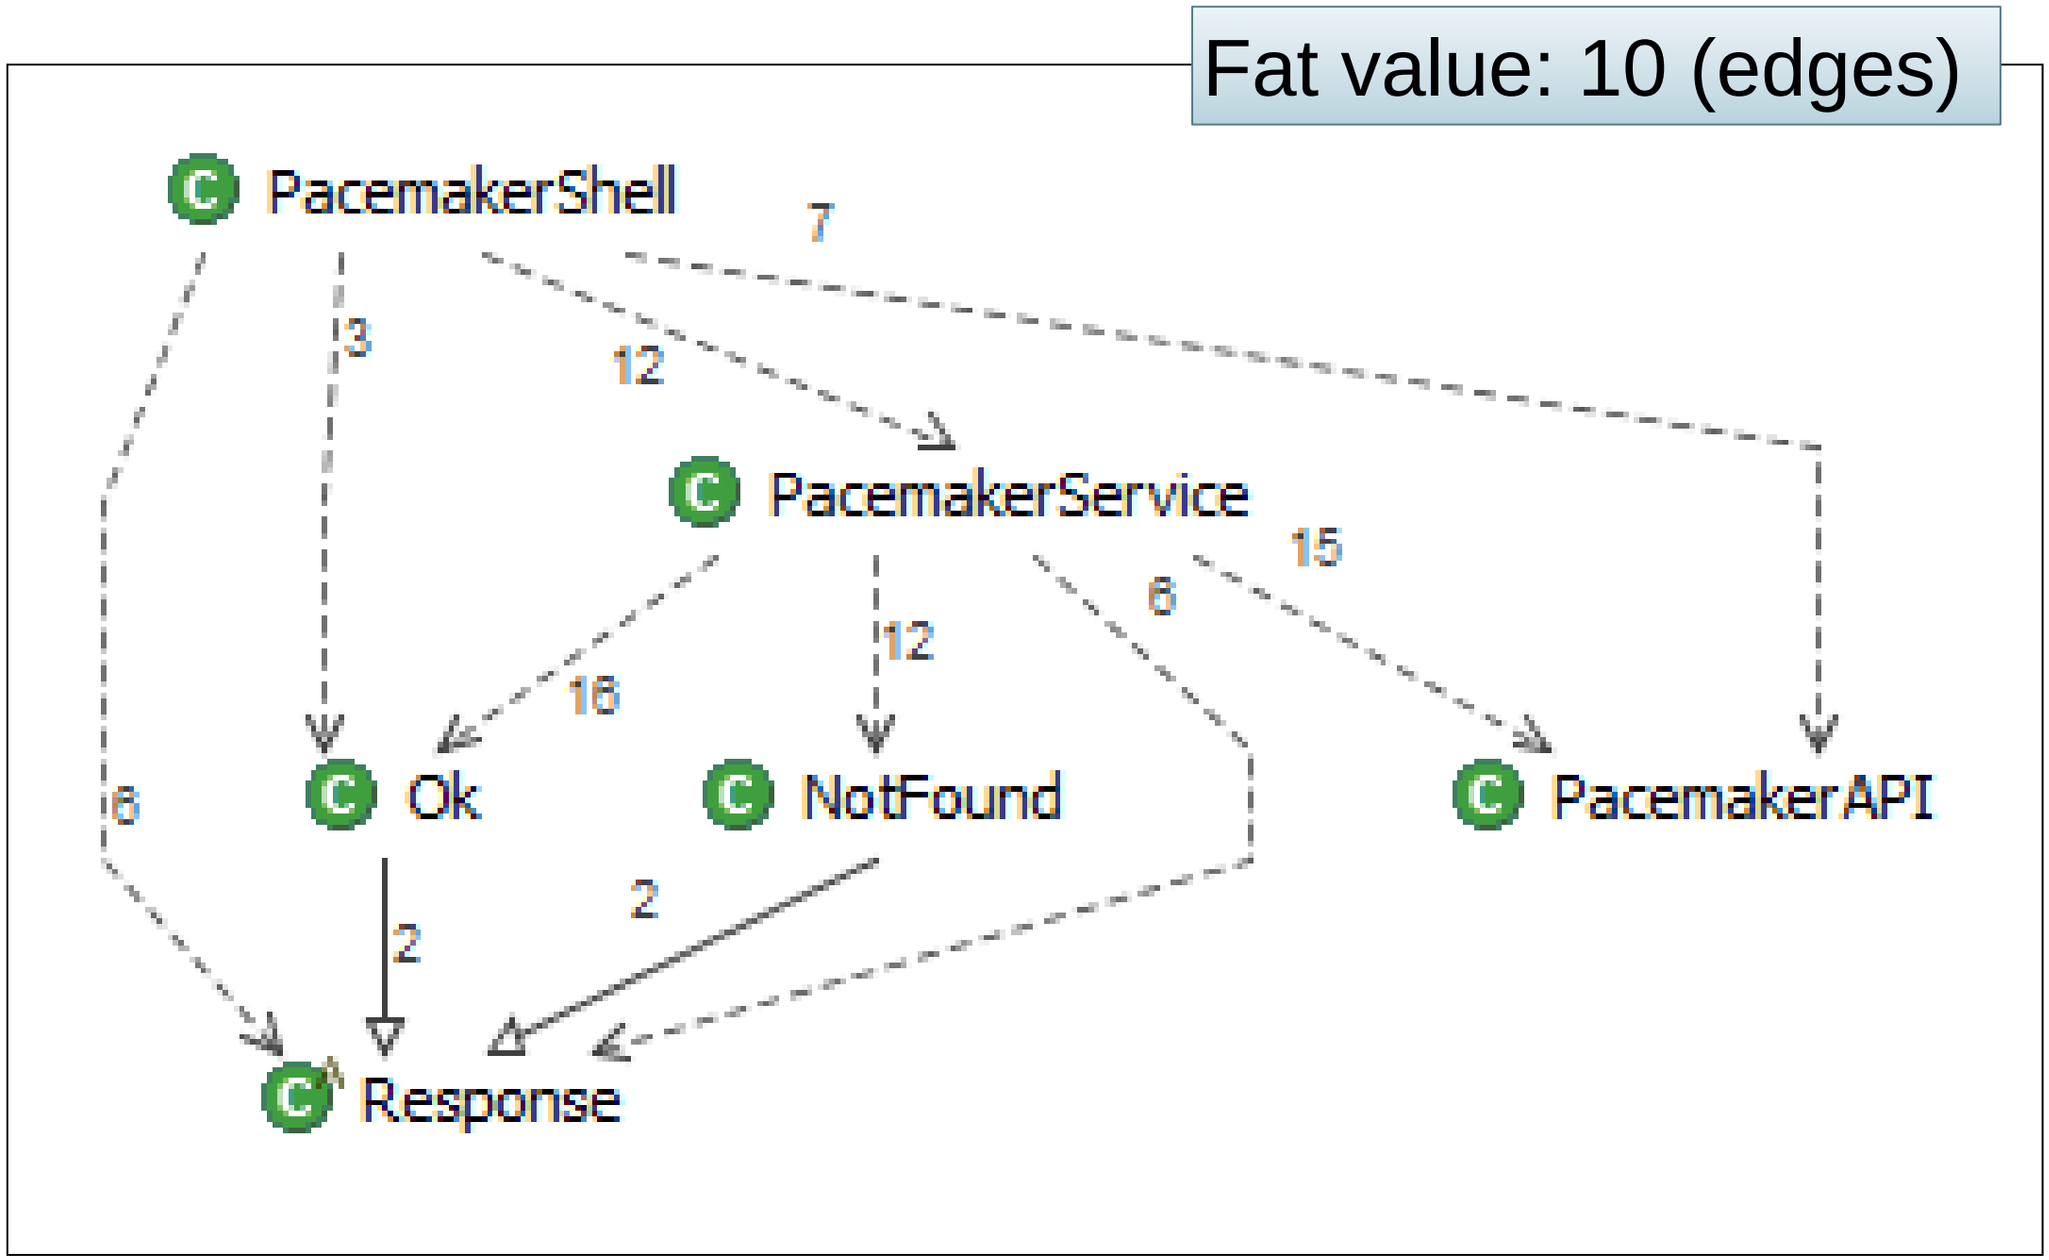
Dependency graph (utils)



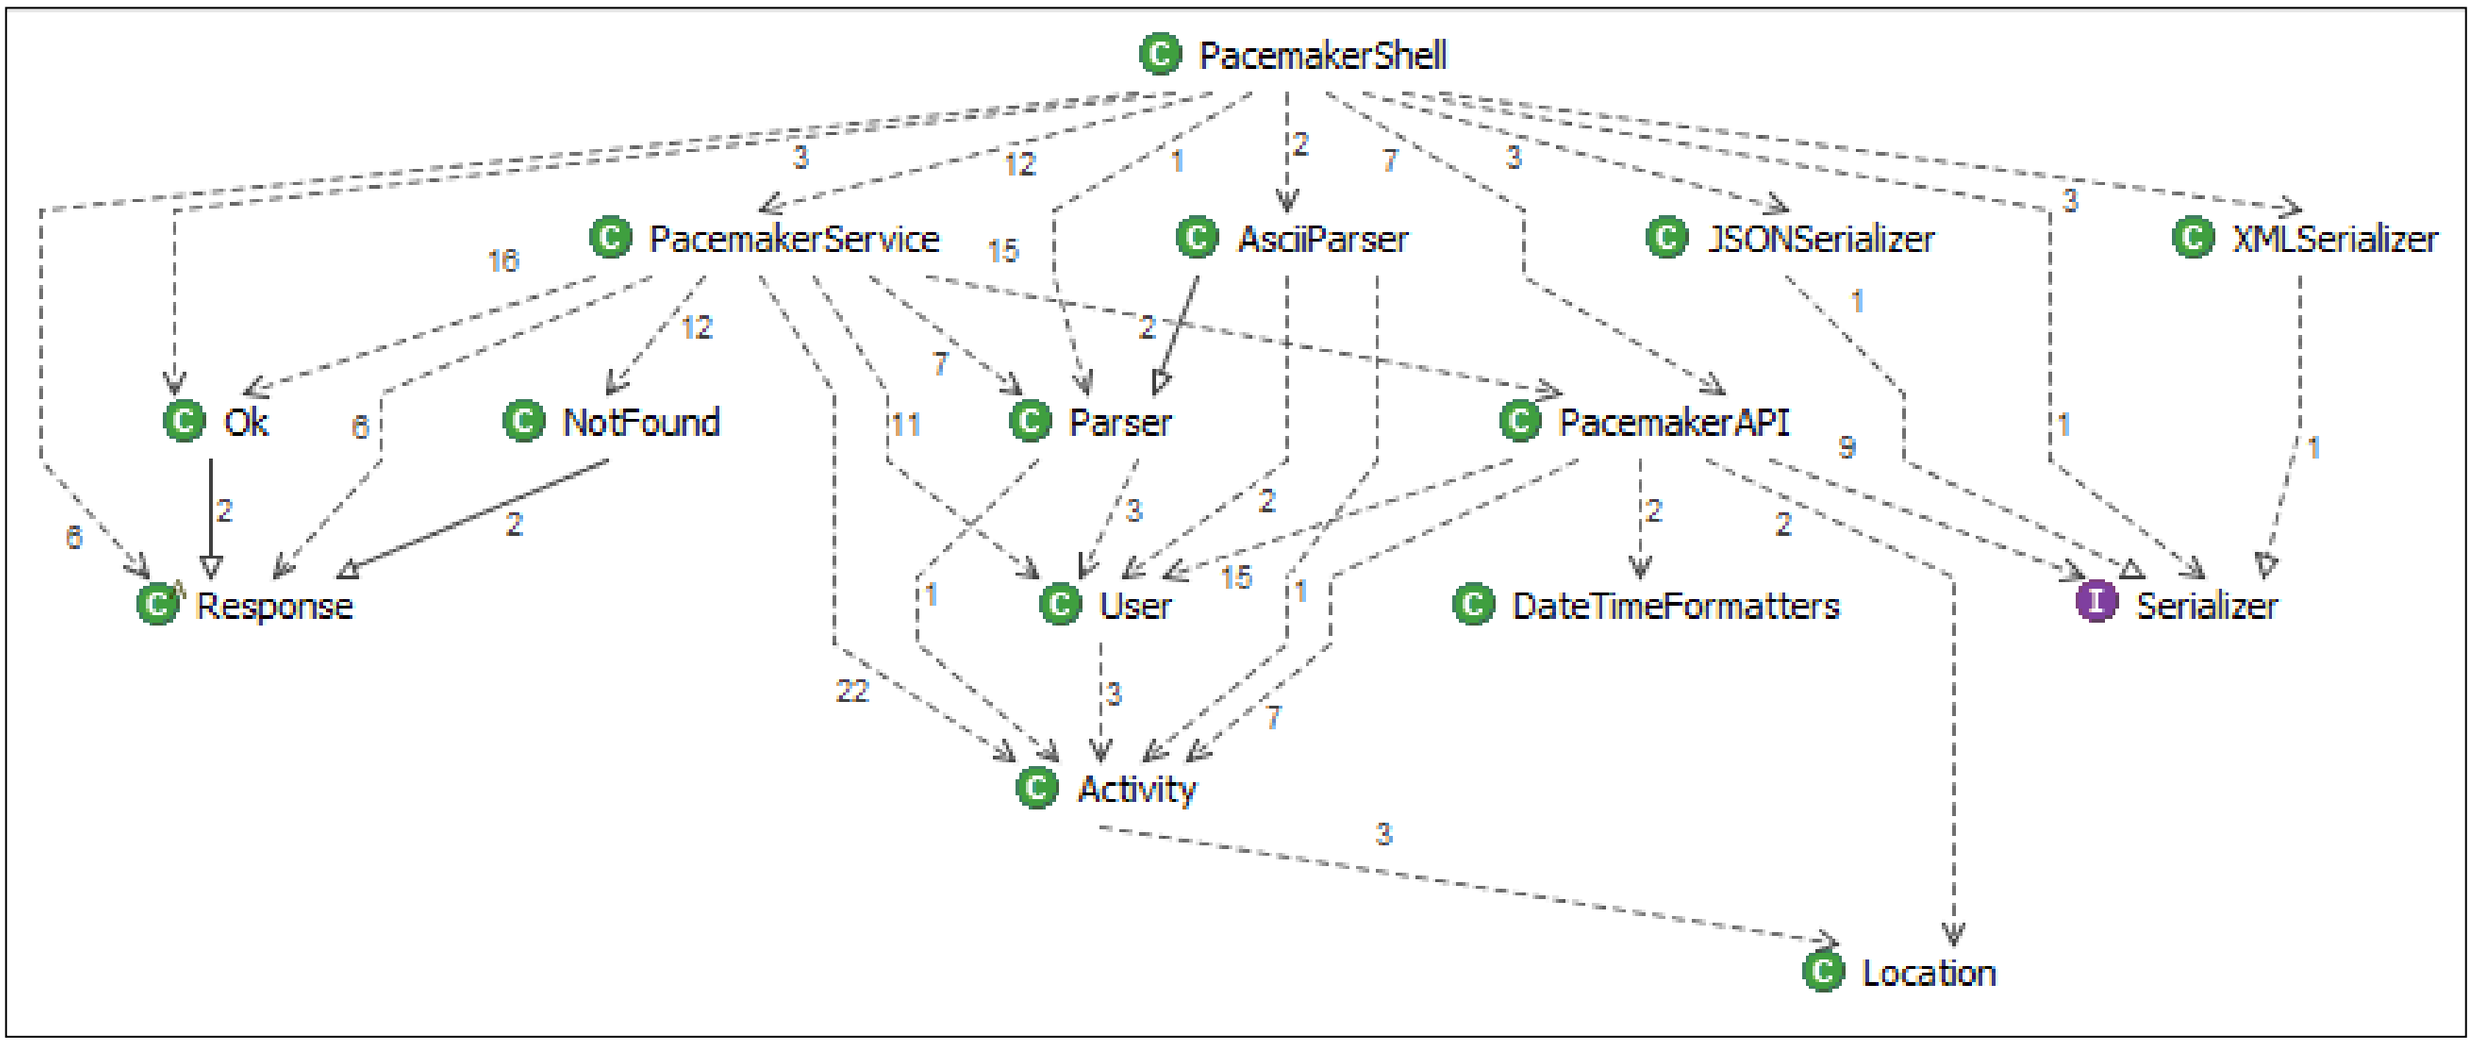
Dependency graph (parsers)



Dependency graph (controllers)



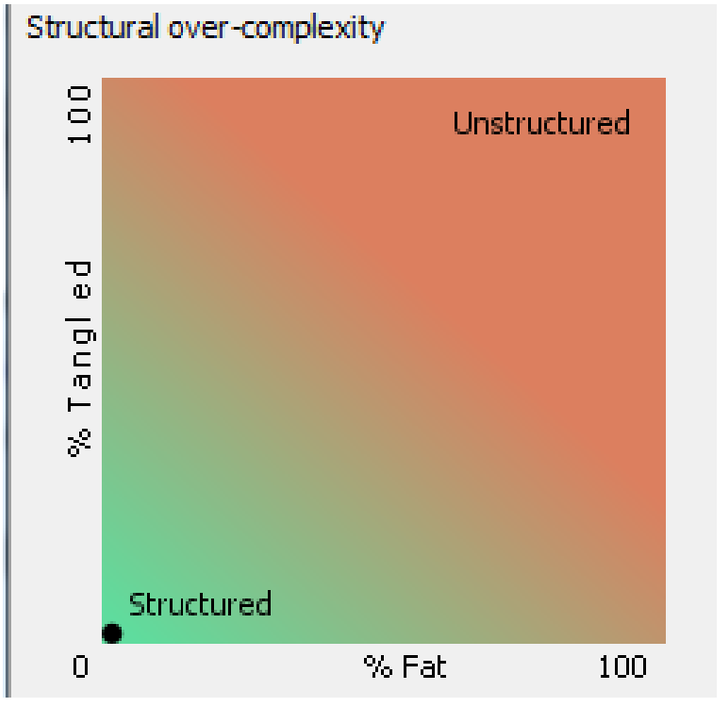
Dependency graph (no externals)



Summary of pacemaker-console-xtend

Flat Tangles

Level	#Items	#Tangles	#Tangled items	Biggest	Degree
Leaf package	4	0	0	0	0%
Jar	1	n/a	n/a	n/a	n/a
Outer class	18	0	0	0	0%



XS breakout by metric (and scope)

Metric (and scope)	Threshold	#Offenders	Offenses (%)	XS contribution
Tangled (design)	0	0 of 1	0%	0%
Fat (design)	120	0 of 1	0%	0%
Fat (leaf package)	120	0 of 4	0%	0%
Fat (class)	120	0 of 23	0%	0%
Fat (method)	15	2 of 123	2%	100%
Total				**100%**

Items with highest XS: 2

Item	Tangled	Fat	Size	XS
pacemaker-console-xtend.models.Activity.equals(java.lang.Object):boolean		17	128	15
pacemaker-console-xtend.models.User.equals(java.lang.Object):boolean		16	118	7

Dependency graph (with externals)
